

Striving to release valuable resources and streamline office efficiency?

Remote Management Services gives you the vital insight you need to optimize your document environment.

Empower your organization to make smarter business decisions with Remote Management Services. By capturing accurate and reliable information with our intelligent web portal and releasing valuable time and resources through automated device management, your company will be able to focus on its core business.

Remote Management Services will enable you to adapt quickly to changing business requirements and give you the confidence that you will continue to operate with efficiency. The web portal presents information clearly and concisely, which is vital for positive action to be taken when optimizing your fleet of printers, Multifunctional Products (MFPs) and other networked document devices, whilst automated device management takes the daily hassle out of administering your entire fleet.

Instant access to the information you need

Imagine being able to view the status of your entire networked document fleet at one simple web portal. Remote Management Services makes this information transparent and enables you to make informed business decisions about optimizing your fleet. Insight into usage statistics, volume ratios and optional cost reporting is all displayed on-screen through an intuitive Graphical User Interface (GUI), allowing you to instantly examine the detail you need. This vital information allows you to identify the optimum configuration and location for both new and existing document devices, leading to greater office efficiency.

- ***Gain the power to improve performance in your office***
- ***Save up to 350 hours per year with automated management***
- ***Over 126,000 customers use our @Remote technology worldwide***

Release valuable resources within your office

Innovative automated management is an integral part of our Remote Management Services. Designed to deliver a better quality of service, it takes the daily hassle out of device management and allows your team to focus on their core business tasks. The service routinely reports meter readings to reduce administration and can perform other essential tasks to increase the uptime of your networked printer and MFP fleet. Optional service call anticipation, advanced consumable ordering, and the remote implementation of firmware upgrades can be seamlessly included to match your exact business needs.

Peace of mind with total security

Expert analysis does not come at the expense of your company's confidentiality. Our Remote Management technology is certified to ISO 15408, the same global standard demanded by major corporate organizations and government institutions, giving you absolute peace of mind that your data is well protected.

Remote Management Services is powered by @Remote technology.

The Document Consulting Experts

Take control of your business with our Managed Document Consulting services. We empower you to make smart decisions based on the best information and advice available. The result is a Total Document Solution, more productive and secure than ever before, achieving tangible cost benefits and allowing you to focus on your core business.
